NIHR | Surgical MedTech Co-operative

NATIONAL MEETING 2019
TUESDAY, 19 NOVEMBER 2019
CLOTH HALL COURT, LEEDS

Photovoice Challenge:

transforming surgical technologies for patient benefit

Transformative technologies need to transform quality of life, in addition to health economics and patient outcomes.

The Surgical MIC is looking for patients/carers/public to submit images that represent concerns and issues, that will help innovators understand the everyday realities and lived experience of undergoing colorectal, vascular or liver/pancreas/gallbladder surgery.

A selection of these images will form the basis of our afternoon workshop at our National Meeting.

For more information and submission details, please click on the "More Information" link below or contact the Surgical MIC.
