

## **NIHR Surgical MedTech Co-operative Patient and Public Involvement and Engagement Strategy Framework**

---

### **Review and feedback from the NIHR Central Commissioning Facility PPIE Team**

Thank you for submitting the draft Patient and Public Involvement and Engagement (PPIE) strategy for the NIHR Surgical MedTech Co-operative. The PPI Team has reviewed the strategy using the 'Core components for a PPIE strategy' as a framework (see appendix 1).

The co-development approach between the MIC management and PPI group in the production of the strategy is commendable. The introduction into the work of the MIC and how PPIE will support that is welcome. The provision of a separate detailed action plan is noteworthy.

Overall, the strategy incorporates all the core components for a PPIE strategy, thus, no areas for improvement are suggested. We look forward to update reports on the implementation progress.

We hope this is helpful feedback for the MIC. If you have any questions or would like to discuss any of the feedback, please do not hesitate to contact Saumu Lwembe, CCF PPI team at [Saumu.Lwembe@nhr.ac.uk](mailto:Saumu.Lwembe@nhr.ac.uk) / 020 8843 8149.

# Strategy: Core components

- **PPIE purpose, aims and objectives** that align with, and support delivery of, the overall aims and objectives of the Facility.
- Rolling **programme of projects and activities** to deliver the strategy's aims and objectives over a given time period. PPIE across the Facility and in research themes and projects.
- **Partners and collaborators** with whom aspects of the strategy may be jointly planned and delivered.
- **Leadership and reporting** that ensures progress in delivering the strategy feeds into the management and governance of the Facility.
- **Resources** including a named PPIE lead, training and support for researchers and members of the public, fees and expenses.
- Regular **monitoring and review** that includes capturing **examples of impact**.
